

**Riverfront Groundwater Contamination Site  
PRP Information Summary**

**Current Entity:** Marchem Coated Fabrics, Inc.

**Other Related Entities:** Dash Multi-Corp, Inc. (parent company of MarChem)  
(see flow chart for how these companies are related; supporting documentation contained in 104e response)

1972 - 84

**Brief description of waste streams involved and source of information:**

- ARP used PCE at their Metals Unit, but had not generated any waste since 1984; metals unit had been operating on Industrial Drive since 1972 (Dale Koch, interview by MDNR, 8/11/87)
- Tubes passed through series of rolled rags; first rag had PCE dripped onto it; excess solvent caught and then pumped back into raw material drum; solvent reused in this manner until it has evaporated (Dale Koch, interview by MDNR, 8/11/87)
- ARP at Orchard Street never used organic chlorinated solvents (Dale Koch, interview, 6/23/99, 4/24/00)
- PCE was used by ARP in their tube mill until approximately September / October 1988 (Chester Nichols, interview with MDNR, 6/11/92)
- ARP dumped a lot in the creek (Marvin Schroeder, interview, 5/6/99)
- ARP used PCE at their metals unit but had not generated any waste since 1984 (Richard Willer, interview with MDNR, 8/11/87)
- ARP dumped dyes in stream in lowlands by Missouri River (Wilsons, interview)

**Date Information Request Response received:** April 10, 2000

**Highlights of Information Request Response:**

- In February 1989, ARP sold all assets of its Coated Fabric Division to MarChem; Marchem periodically performs coating operations on fabrics for ARP
- Kellwood has guaranteed certain performance obligations of ARP
